## Easy Delivery of Course Resources

Advancing student engagement and learning

Delivering course resources efficiently is key to fostering a meaningful learning experience and improving student engagement. Whether you teach online, on-campus, or in a hybrid learning environment, Ex Libris Leganto enables you to easily select, manage, and share course resources, while saving you time and effort.

With Leganto, you can combine materials of all types to create structured, comprehensive resource lists that make your expectations clear to students. You can work by yourself or in collaboration with instructional designers, teaching assistants, librarians, and peers. Leganto embeds your resource list in Blackboard, Canvas, Moodle, or other learning management systems (LMS), making it simple for you and your students to access all materials in one place.

### Leganto Essentials

Add all types of course materials

Ensure online access, on any device

Embed course materials in your LMS course page

Reduce costs for your students

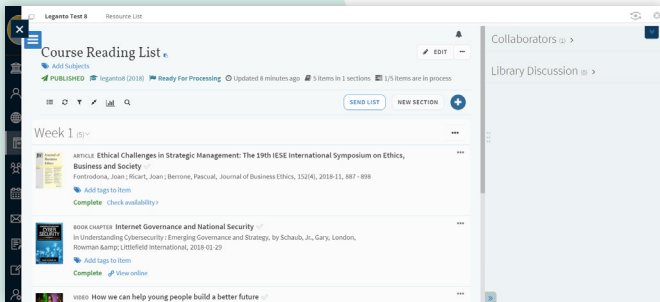

Access engagement reports and advanced analytics

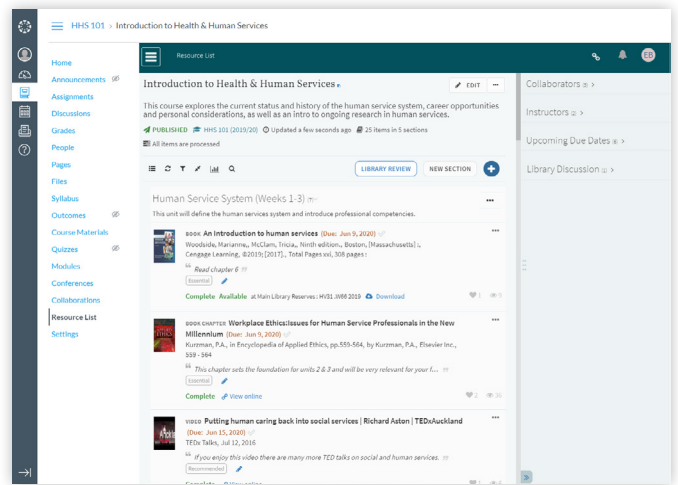

Roll over course resources from term to term

*"Leganto is SO user friendly for me as a Professor - saves time and is a one stop shop."*

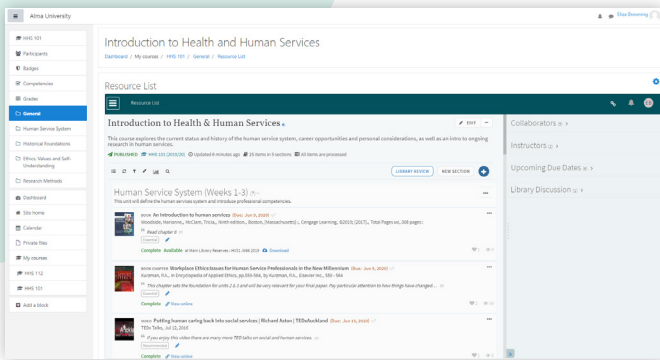

Professor, University of St. Thomas

## Support for online, on-site, and hybrid courses

Ensure that your students will be able to access scholarly course materials from anywhere, on any device:

Share resource lists directly through your course page in the LMS.

Get help from the library to ensure copyright compliance.

Easily find alternatives for physical materials, leveraging the library collection.

Provide students with an intuitive and consistent experience across all courses.

Avoid the hassle of missing or broken links.

## Gather materials from any source and easily share them with your students

Quickly bookmark web resources, drag library resources or reference manager items, or upload files:

Find any electronic or physical resource that your library offers and quickly add it to your list; links to library resources are created automatically.

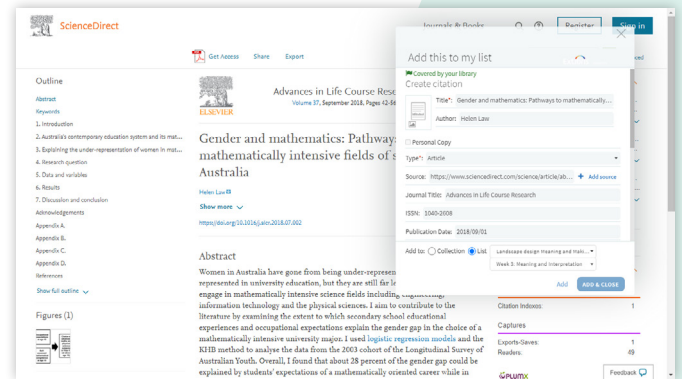

Easily add items from scholarly databases, publisher websites, OER collections, online bookstores, YouTube, and other web platforms.

Upload files, individually or in bulk, drag items from your reference manager tool, and import RIS or BibTeX files.

Explore other relevant materials through automated recommendations of related content.

Leganto Cite It! Adding web resources to reading lists

## Connect with students and understand usage

Ensure students can easily access course resources and see which materials are used, when, and by how many students:

Group resources into sections and add tags, due dates, and notes, so students understand what they need to do and when.

Encourage student participation and collaboration.

View comprehensive usage analytics for each resource at any point during the term, or as you are preparing for the upcoming term.

Leverage student feedback to improve instruction, immediately and in subsequent terms.

Identifying student engagement with course materials

*"The new system seems amazing – very easy for students to access from within eLearning"*

Professor, The University of Texas at Dallas

## Make course resources affordable

Reduce costs for your students by using library existing collections and other materials available at no cost:

Replace coursepacks and textbooks with OER or with materials that are open access or available through the library, at no cost to students.

Leverage digitized book extracts and articles, provided under fair use or fair dealing.
